

Setup Heading

This heading is reached by choosing **View | Administration** and pressing the **Setup** heading button. It includes buttons that open the following admin forms:

- [Modules Editor](#) — enable or disable major functional areas of the Projector software. You may also view your Projector invoice and billing history.
- [System Settings Editor](#) — configure core installation settings
- [Account Settings Editor](#) — configure high level installation settings
- [User Defined Fields Editor](#) — add custom attributes to entities in Projector
- [Currencies and FX Rates Editor](#) — define the currencies used to invoice clients, track expenses, and manage accounting transactions
- [Budget Alerts Editor](#) — define when projects are considered over budget and give a visual indicator or send an email
- [Skills Editor](#) — manage what skills your resources have for scheduling purposes
- [Stage Editor](#) — model your engagement and project lifecycles through control of permissions, notifications, permissible edits
- [Scheduled Hours Color Map Editor](#) — color code scheduled hours according to their engagement type or stage
- [Permission Sets Editor](#) — control who can access Project Workspaces
- [Projector Web Editor](#)
- [External Connectors Editor](#) — manage connections to JIRA and Zendesk
